### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's Representative, John Griffith, on 25 January 2010.

In Claim 22:

Line 1, please delete "for".

Line 6, please delete "coupled to receive" and insert "receiving".

Line 7, please delete "configured to provide" and insert "providing".

Line 10, please delete "configured to provide" and insert "providing".

Lines 14, 15, please delete "configured to:"

In Claim 27:

Line 1, please delete "for".

Line 6, please delete "coupled to receive" and insert "receiving".

Line 8, please delete "configured to provide" and insert "providing".

Line 11, please delete "programmed to provide" and insert "providing".

Line 15, please delete "configured to:"

In Claim 31:

Line 1, please delete "for" and insert "of".

The Examiner's Amendment was made to positively recite "intended use" limitations.

**The following is an examiner's statement of reasons for allowance:** The prior art combination of Wynn (U.S. 5,971,271) in view of Aoshima (U.S. 6,241,524) & Walker (U.S. 5,909,486) does not disclose, suggest or render obvious a gaming machine video overlay device that "[determines] one or more regions of the game image that are not occupied by a display field, including the game display field, wherein the one or more regions are portions of the game image that if overlaid would not overlay a display field," in combination with the other claimed limitations.

While Wynn mentions a commercially available video overlay card, he does not disclose or suggest the currently claimed separate hardware feature of an overlay device, apart from game electronics, that determines the regions of the game image to overlay a player tracking information image.

Additionally, in contrast to the claimed invention & Wynn, which are both directed towards gaming machines with player tracking, the secondary reference to Aoshima is directed towards a self-contained video game apparatus that is not in communication with a host computer to receive player tracking information. Further, Aoshima does not even mention network connections. Moreover, Aoshima's message field (Fig. 8, 80) is presented on the game display field, which directly contrasts with the currently claimed invention requiring that an overlaid image cannot overlay a display field. As such, Aoshima does not teach the claimed overlay of a player tracking image. For these reasons, Aoshima fails to cure Wynn's shortcomings & cannot be relied on.

Moreover, since Walker was relied on merely for teaching displaying player tracking data on a slot machine display, Walker similarly fails to cure Wynn's shortcomings. As such, since the prior art fails to disclose, suggest or render obvious the claimed invention, Examiner believes it is allowable.

Claims 22, 24-27, 29-31 and 33-37 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
